Q & A with RoC

What's behind skin blemishiness and brown marks?
The formation of brown marks, or pigmentation on the skin, stems from hormonal changes, contraception, pregnancy, sun exposure and the natural ageing process. This may result in your skin taking on a dull and uneven complexion.

How can these marks be lightened?
With the RoC[®] SOYA[™] UNIFY range, you can reduce brown marks and create an even complexion so that your skin regains its natural, youthful glow. The range contains a patented form of active soy that is clinically proven to regulate the production and transfer of melanin, the pigment responsible for brown marks. At the same time, trace elements like copper and zinc help to stimulate cells, while light reflectors increase your skin's radiance. The range consists of a cleanser, exfoliating gel, day cream with UVB filter and light reflectors, and a night cream.

Try RoC[®] SOYA[™] UNIFY to give your skin back its youthful, natural radiance. Regular use leads to a visible improvement in skin tone and leaves your complexion even-toned and younger looking.

Available at selected Sainsbury, Red Square and Foy's stores, as well as Orla Kierny and selected pharmacies. For more information, call 0800 410032 or visit www.rocpouthridge.co.za
